## ADDITIONAL GATRONOMY PROGRAMS AND SERVICES

### Mineral Water Tasting

Mineral water contains minerals and other dissolved substances that give it a peculiar taste and oftentimes healing power. It comes up to the surface from deep,

unpolluted layers. The mineral content of natural mineral waters is usually 500-2000 mg/l. The same feature of medical waters can reach even 20000 mg/l. Depending on their types, there are mainly calcium, magnesium, sodium, bicarbonate, chloride and sulphate waters, and their variants. Their fluoride content is relatively high as well. The consumed water interacts with the body tissues in multiple cycles, this is how mineral waters exert their beneficial effect. (For example,

1400 liters of water pass through an adult's brain, and 2000 liters of water wash the kidneys each day.) Human body needs a range of substances, and it is not sure that we take them with food, but they can be found in the consumed mineral water.

During the evening several kinds of Hungarian and foreign mineral water can be tasted and compared with the help of a sommelier.

### Open Cheese Kitchen and Wine Tasting

At one of the site's points we place a cheese counter rich in decoration elements and cheese. We slice the cheese on the cutting board, and beside we offer fruit, seeds, and pastries. The guests can taste the representatives of the seven main cheese families: fresh cheese, white-mold soft cheese, washed-rind (reddish) soft cheese, mountain ripened cheese, goat cheese, blue cheese, raw-milk cheese. Next to the cheese counter we offer wines of the remarkable wine-regions of Hungary with the help of a qualified sommelier. The wine tasting and the open cheese kitchen complementing each other provide an unforgettably complex gastronomical experience.

## Macaron Tasting

As we are diving into the mystery of making the French macaron, we realize that this is not that simple! It is originated from the town of Nancy, and first was mentioned in the 18th century as a confectionary made according to a secret recipe.

What is sure is that egg whites, almond powder, icing sugar, and crystal sugar are needed to make it. The new macaron created by Pierre Desfontaines is a round confectionary put together of two halves filled with soft chocolate cream. While the classical type is extremely crispy and dry, the new version is also lightly crispy outside but very soft, and

tender inside. But this has been further developed, and we bring it with special flower tastes to the guests. Of course, the taste is coupled with the right color. It is worth for everybody to taste this novelty – it is an unforgettable experience!

chocolate-coconut, walnut, peach, poppy seed, strawberry, raspberry, coconut, vanilla, pistachio, coffee, peanut, pistachio-chocolate, truffel cream

## Champagne Fountain

The champagne fountain is an elegant and fashionable way to make our parties more exciting since it is inimitable both as a spectacle and as a specialty. It can be filled with punch, wine or refreshers. We recommend it equally for luxurious, splendid, relaxed, and family-style events either as an element increasing the quality of the welcome drink or as a separate accessory.
